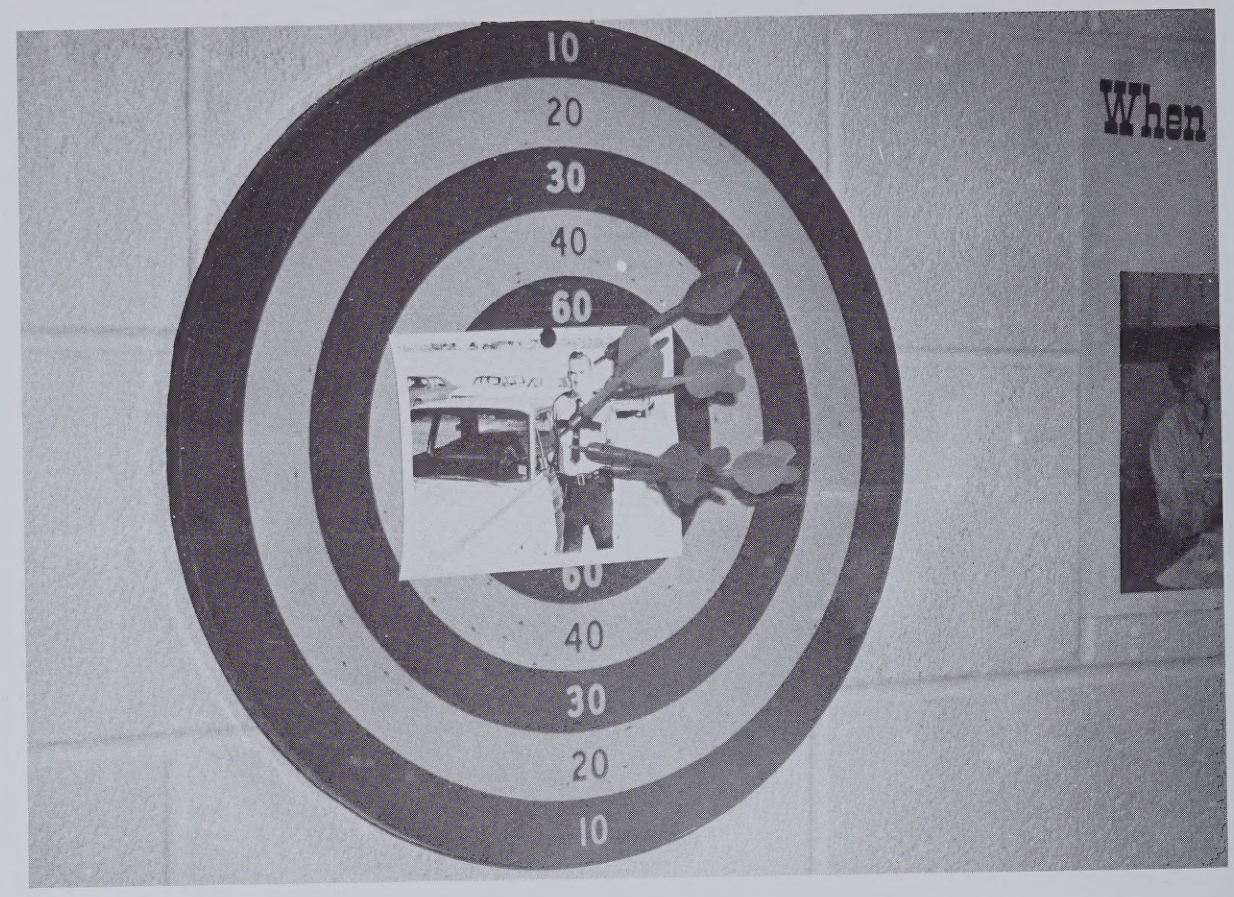
He who knows nothing, loves nothing. He who can do nothing, understands nothing. He who understands nothing is worthless. But he who understands also loves, notices, sees . . .

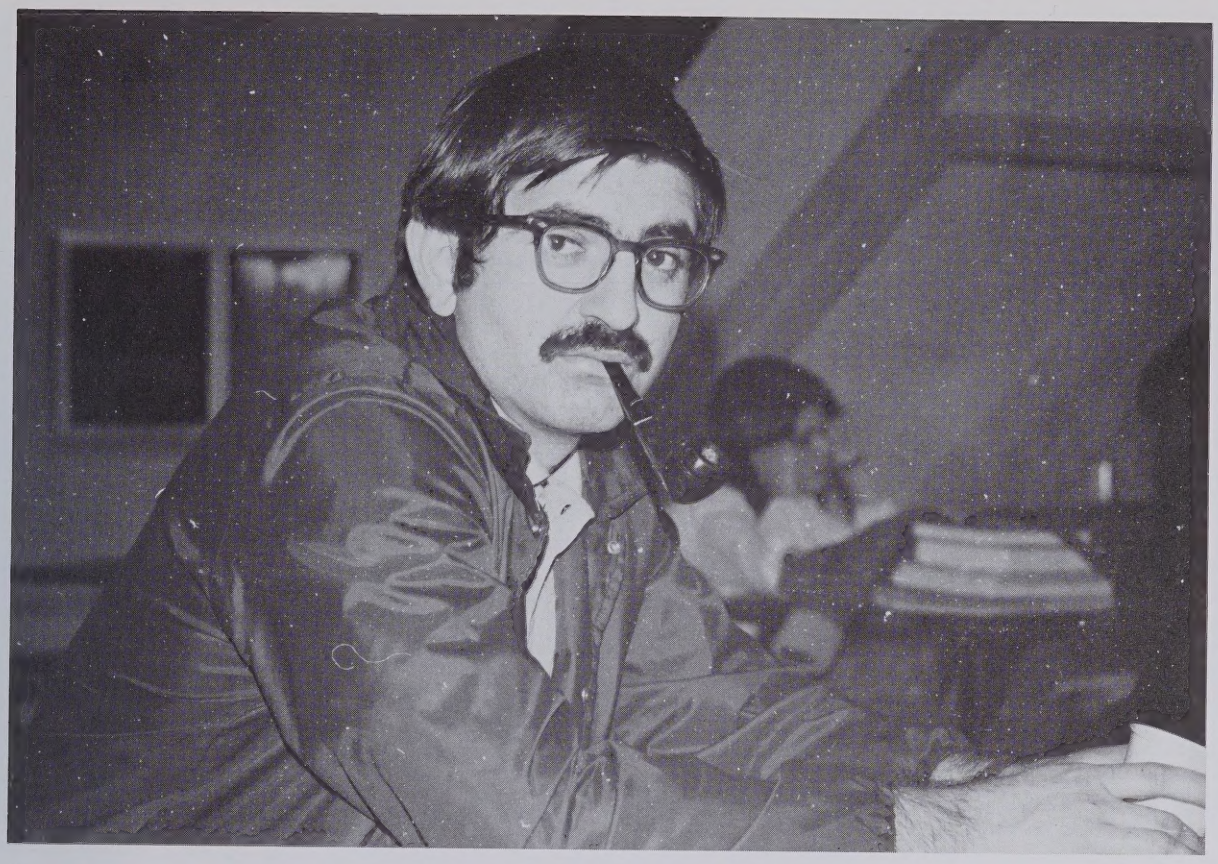
Paracelous

Reflections

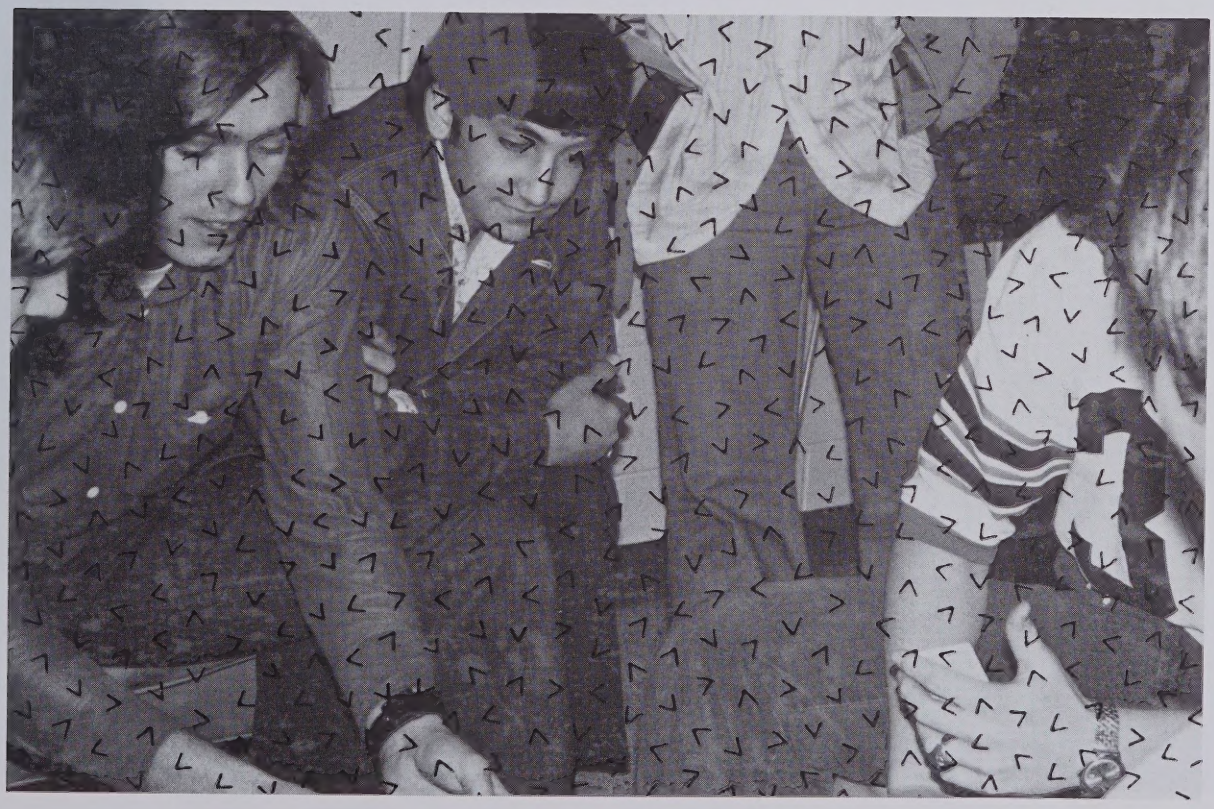


In spite of struggle, tension, confusion, and controversy . . . This was the year

Of beauty, harmony, relaxation, and peace . . .



Of hope . . .

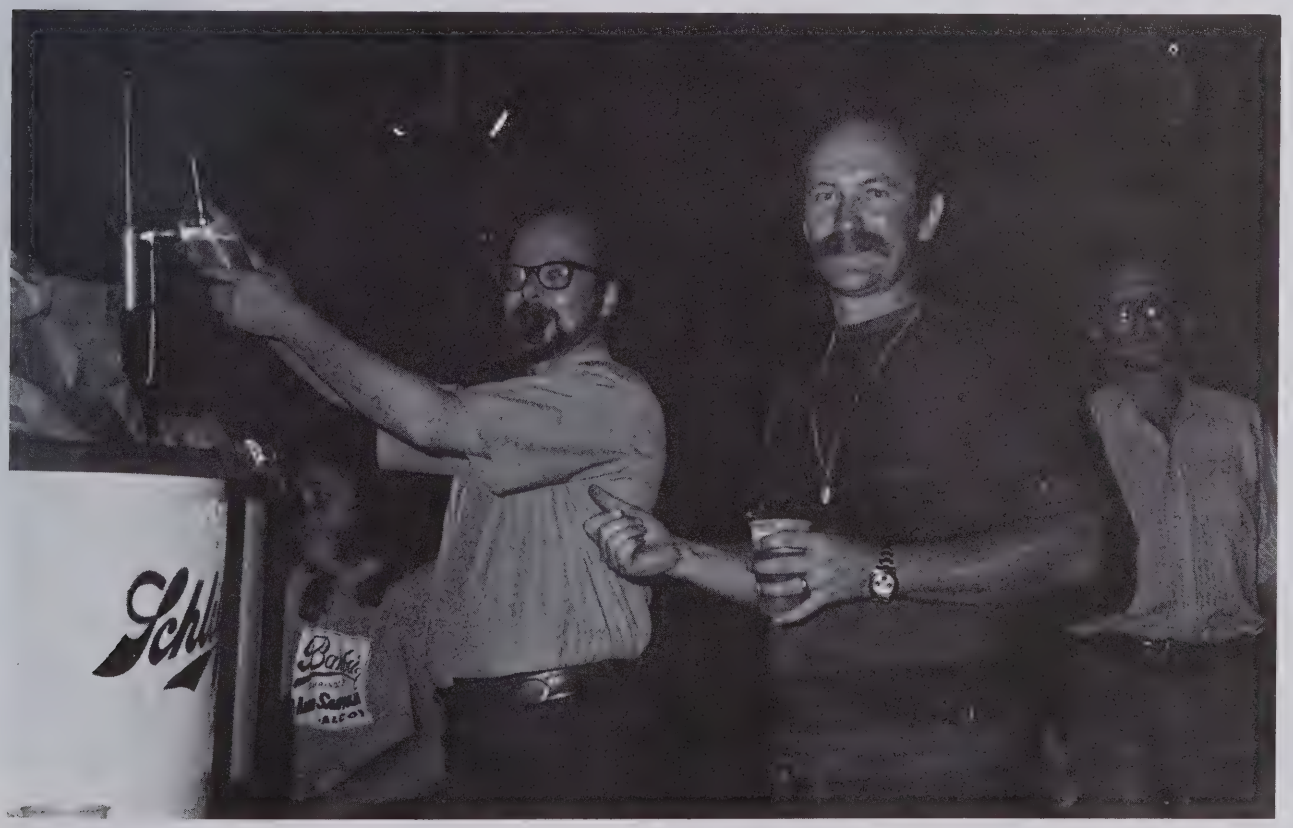


Of concern for others . . .

Of victory . . .

Of happy faces . . . love . . . and laughter

This is our place . . . There is no place like it . . . We've made it what it is . . . NOTHING!!



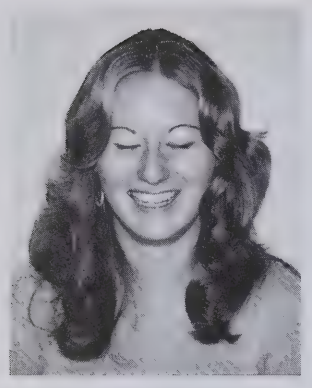
This was the year of picnics at Tanglewood and . . .

This was the year . . . of Watergate . . . Energy Crisis . . . Arab-Israeli War . . . and still one more picnic

Waiting in lines . . . frustration . . . arranging . . . rearranging . . . more lines . . . I.D. cards . . . parking decals . . . more frustration . . .

A man has got to know his limitations . . . .

"You shoot me and I'll tell George McSwain on you!"



Chemical Analysis
of
Women

ATOMIC WEIGHT: Reputed to be 120. Isotopes are known from 90 to 180.

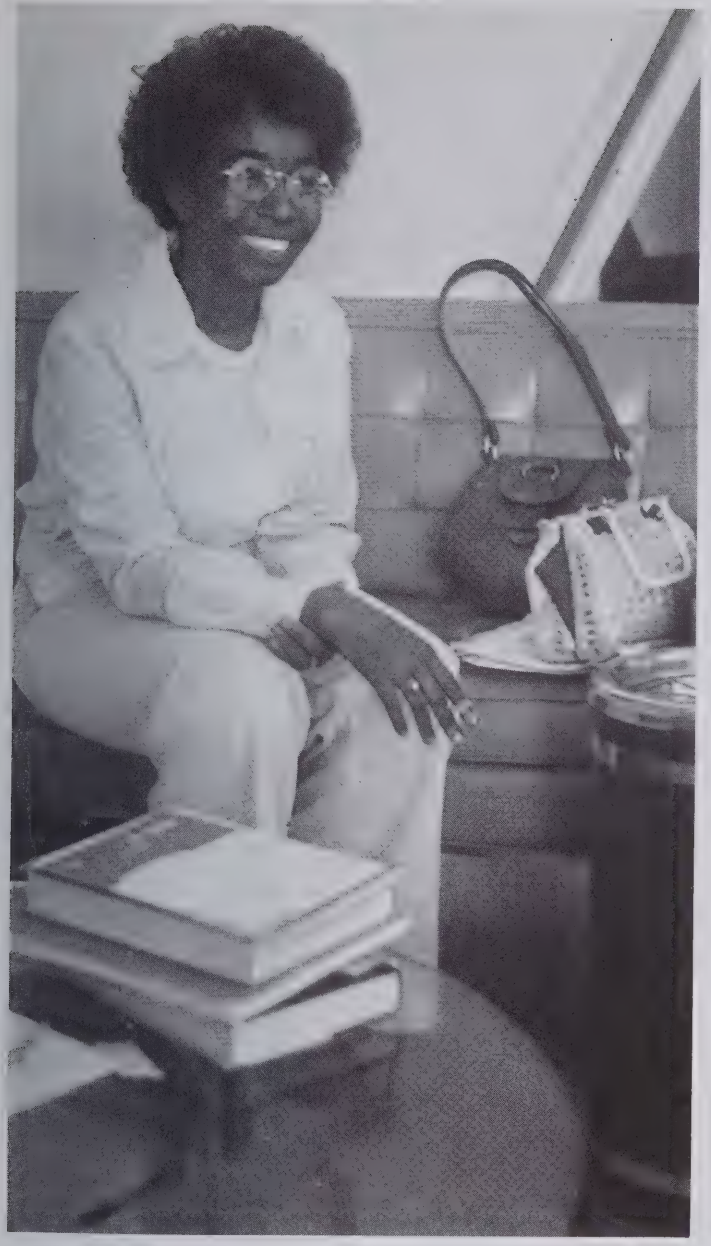
OCCURRENCE: Found both free and combined. In combined state it is found with man.

PHYSICAL PROPERTIES: All colors, sizes and shapes. Seldom found in pure state. Boils at nothing and will freeze without reason. Surface is usually covered with film of paint or oxide in various colors and depths. Unpolished specimen turns green in presence of highly polished one. All varieties melt if used correctly. Density is not so great as generally supposed.

CHEMICAL PROPERTIES: Highly explosive and dangerous in inexperienced hands. Extremely active in the presence of men. Possesses great affinity for gold, silver platinum and all precious stones. May explode spontaneously when left alone with man. Sometimes yields to pressure. Fresh variety has great magnetic attraction, but ages rapidly.

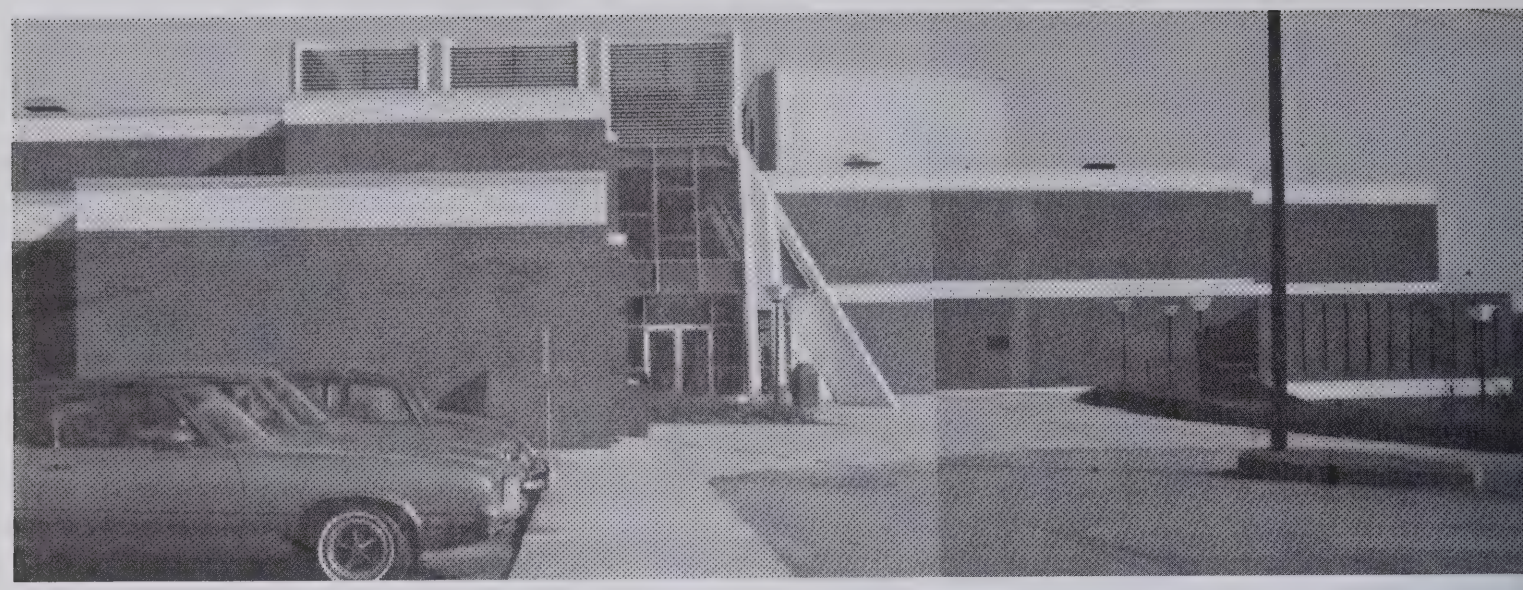
USE: Chiefly experimental. Efficient cleaning agent. Acts as a positive or negative catalyst in the production of fevers.

UNSOLVED PROBLEM: The thing that mystifies many engineers is the fact that the most streamlined variety offers the most resistance.



RIGHT ON, TRICKY DICKY!!!

That was an exclamation, not a prayer!



Running up and down the steps . . . miles of sidewalks and corridors . . . the games we won . . . instructors who really cared . . . the good times . . . that someone special . . .

Venture out into the world . . .learning . . . what it is all about . . . learning about yourself . . . learning about others . . . learning about the environment . . .

In Memorian . . . Sandra Lee Johnson . . .

Tuesday, October 9, 1973, was a sad day at Forsyth Technical Institute when we learned that Sandra Lee Johnson had died in an accident on her way to class that morning. We are glad that we knew her as a good student, a loyal friend, and a kind human being. Her family, her friends, and her classmates in the Executive Secretarial Science curriculum have established in her memory the Sandra Lee Johnson Memorial Scholarship Fund.

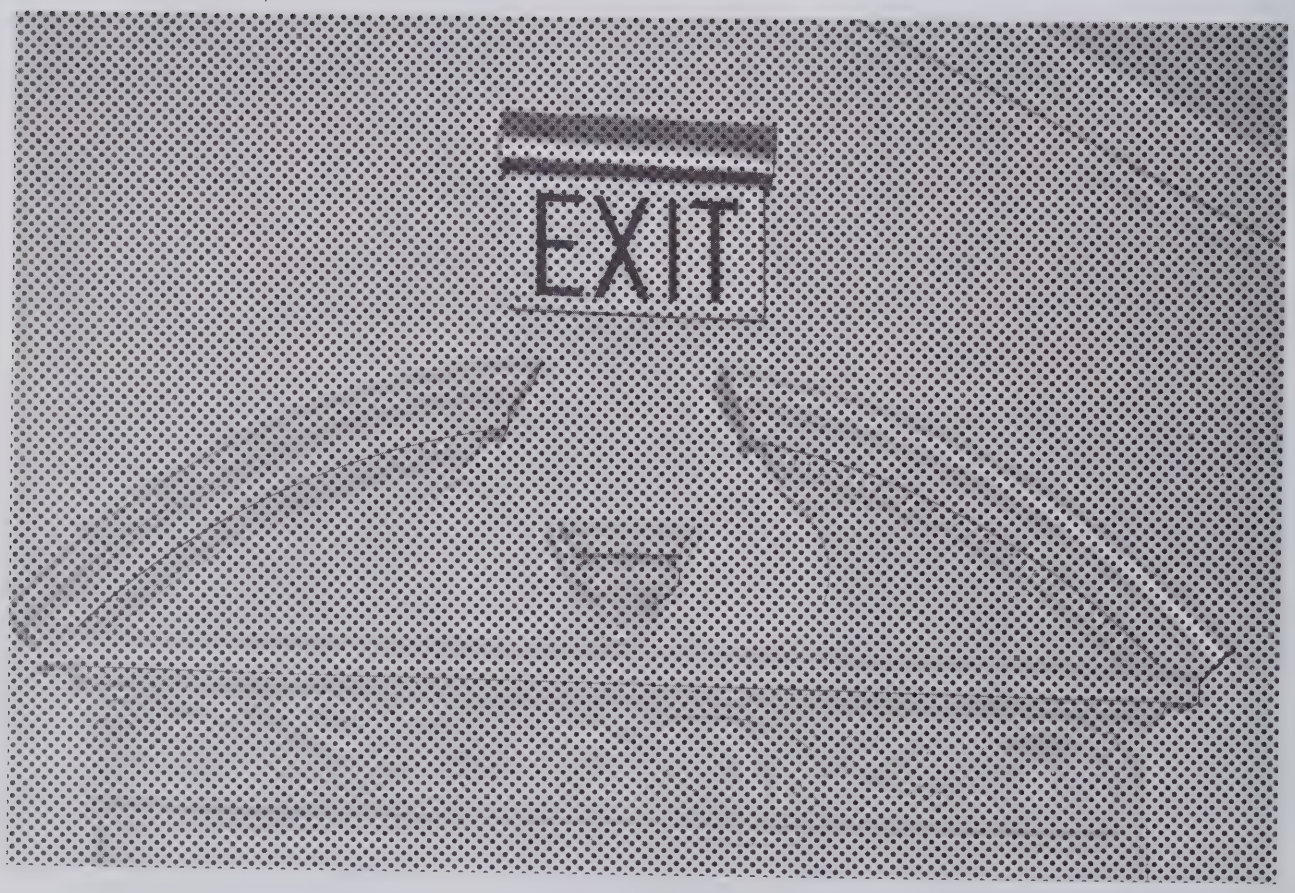
This was the year . . .

of waiting in lines . . .
of lounge crowds . . .
of pollution . . .
of people complaining about what needs to be done . . .
of other people doing something about it . . .



This was the year of memories . . . this was the year that was.

HAPPY TRAILS TO YOU!
